

EscapeCharacters

Write a class `EscapeCharacters.Main` that produces the following output on the console. (Output contains some hints!)

Console Example

```
escape sequence is started with a backslash: \  
to print a tab ( ) use "\t"  
to print a backslash (\) use "\\"  
to print double quotes (") use "\""  
to print a single quote (') use "'" "  
to start a new line (  
) use "\n"
```
